
NEX-COMPRT-A & NEX-COMPRT-B

General Description

There are applications where the height of the Tektronix P6860 probe prohibits connection to a target. The NEX-COMPRT-A/B product provides a low profile, right angle connection of the Tektronix P6860 probe to the target. Depending on the orientation of the pad on the target, it may be necessary to connect the P6860 from the left or the right side of the pad layout (please refer to Figure 1 for reference). For this reason, there are two right angle products available: NEX-COMPRT-A and NEX-COMPRT-B. The customer application should be carefully reviewed so that the proper right angle adapter can be chosen.

Each NEX-COMPRT-A/B product comes with the hardware necessary to connect the right angle adapter to the target. Please refer to Figure 1 for more information. Connection of the Tektronix P6860 probe to the right angle adapter requires one Tektronix Nut Bar that is supplied by Tektronix with the P6860 probe.

NEX-COMPRT-A/B works on target boards ranging from 0.020" – 0.130" thick. Please call for information on how to support target boards that fall outside this range.

The NEX-COMPRT-A/B is a matched trace length, impedance controlled design.

The NEX-COMPRT-A/B product includes:

- (1) NEX-COMPRT-A or NEX-COMPRT-B right angle adapter
- (1) Nut Bar
- (1) Elastomer Holder
- (2) Round slot, 2-56 x 1/2, machine screws
- (1) Assembly Diagram

IMPORTANT: NEX-COMPRT-A/B adapters should never be bend beyond 90 degrees.

Setup

Please follow Figure 1 for setting up the NEX-COMPRT-A/B.
